

KMeans Clustering Assignment

Problem Statement:

You work in XYZ Company as a Python. The company officials want you to write code for a clustering problem.

Dataset: customers.csv

Tasks to be performed:

1. K-Means Clustering:

- Load customer data.
 - Check the number of cells in each column with null values.
 - Create a scatter plot with Age as X and Spending Score as Y.
 - Draw a scatter plot displaying data points colored on the basis of clusters.
-
